## **Section 7 – Regulation FD**

### **Item 7.01 Regulation FD Disclosure**

On November 4, 2014 voters in San Benito County passed Measure J, an initiative that prevents the use of a non-exhaustive list of oil and gas production techniques including the use of steam injection. The initiative was passed by a count of 5,021 to 3,733. In advance of the initiative passing, the county preemptively passed an ordinance allowing for exemptions from the application of the Measure when the application of the Measure would result in a taking. A regulatory taking is a situation in which a government regulation limits the uses of private property to such a degree that the regulation effectively deprives the property owners of economically reasonable use or value of their property right to such an extent that it deprives them of utility or value of that property right, even though the regulation does not formally divest them of title to it.

Accordingly, Citadel Exploration Inc. will provide the County of San Benito the ability to compensate the company for the diminished value at the Indian Oil Field based on the reasonable Unrisked Resource Potential the property would ultimately yield, or allow Citadel to proceed with full field development and steam injection under the exemption ordinance.

The Company is furnishing the information in this Current Report on Form 8-K to comply with Regulation FD. Such information shall not be deemed to be “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that section, and shall not be deemed incorporated by reference into any of the Company’s filings under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, whether made before or after the date hereof and regardless of any general incorporation language in such filings, except to the extent as referenced to such filing.

## **SIGNATURES**
